

Kelly S. Messerschmidt
Technical Communications Manager, MSC

<http://mscrecon.com/>

Kelly Messerschmidt is an alumnus of Auburn University, where she earned her Master of Technical and Professional Communication (MTPC) degree and her Bachelor's in English.

Kelly works in the Birmingham, Alabama office of Messerschmidt Safety Consultants and provides services to MSC's Hattiesburg, Mississippi office as well. These MSC offices serve the Southeast, including states such as Louisiana, Tennessee, Georgia, and Arkansas, and regularly perform work in states across the nation.

As MSC's Technical Communications Manager, Kelly Messerschmidt edits all of the technical research papers that MSC submits for publication on topics such as Heavy Vehicle Electronic Control Modules (ECMs), Event Data Recorders (EDRs), legislative and organizational policy for automotive EDRs, and more. She created original text for MSC's websites, including mscrecon.com and MSC's informational site on [Heavy Vehicle EDRs](#). She manages the content of [MSC Recon's blog](#). Kelly is a coauthor of MSC's [whitepaper on proper ECM download methods](#).

In support of MSC's goal to provide proactive safety assistance to motor carriers and Commercial Motor Vehicle safety managers, Kelly Messerschmidt has created user-centered training aids and reference guides for use in the field. She has written, designed, and edited corporate safety and policy manuals for MSC as well.

Before coming to work for MSC on a formal basis, Kelly managed her technical communications company, M Communications, where she provided professional communication services to clients in regional and national advertising firms, engineering firms, non-profits, and government agencies.

Kelly Messerschmidt's prior work includes writing a winning grant proposal benefitting children in Escambia County, Florida, who were affected by Hurricane Katrina.
